Modern LED-Lit Mirrors for Every Interior.

Glass shelf

User Manual / Assembly Instructions

Glass shelf

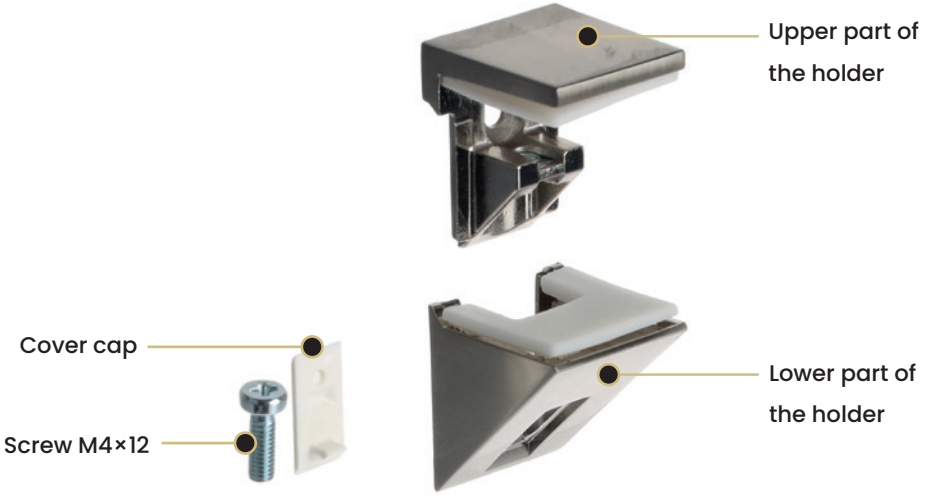
TECHNICAL SPECIFICATIONS

- The glass shelf is made of high-quality glass. Each shelf is supplied with separate stainless steel holders. The holders are adjustable and can be precisely adapted to the thickness and length of the shelf. The inner sides of the holders are fitted with a semi-soft material that ensures a firm grip on the shelf.

PARAMETERS

Shelf thickness	0.8 cm
Shelf depth	15 cm
Optional shelf length	from 50 to 120 cm

FEATURES



! Safety warning !

· Make sure the wall is sufficiently strong to support the shelf.

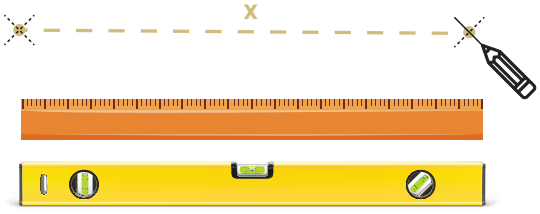
· Use suitable mounting hardware according to the wall type (wall plugs, screws, etc.).

· We recommend carrying out the installation with two people.

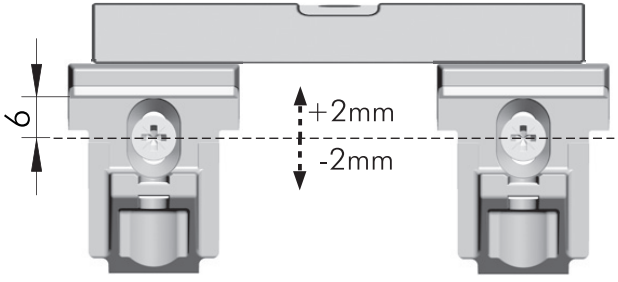
· The shelf is intended only for normal storage of cosmetic and hygiene products; it is not designed for leaning, sitting, or excessive loading.

SHELF INSTALLATION

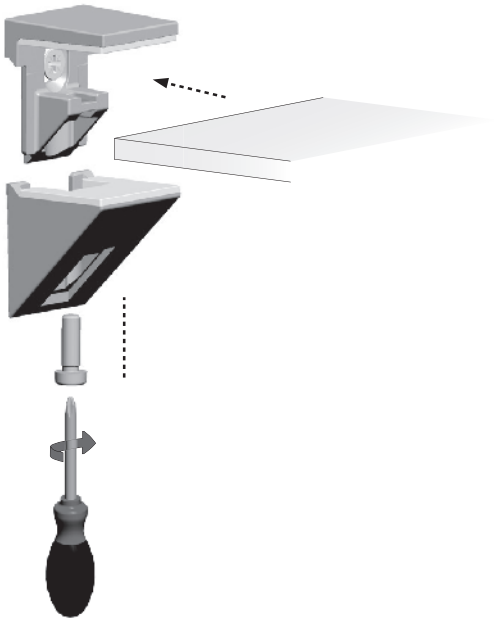
1. Measure and mark the points on the wall where the brackets will be drilled. Use a spirit level for measurement. Make sure the points are marked perfectly horizontal.



2. Attach the upper parts of the holders to the marked points on the wall. For fixing, we recommend using a flat-head screw Ø 4 mm and a suitable wall plug according to the wall type.



3. Place the glass shelf onto the upper parts of the holders. Using the screws (included in the package), screw the lower parts of the holders to the upper parts so that the shelf is firmly secured. We recommend that a second person holds the shelf during installation – this ensures safe positioning and proper tightening.



4. Finally, gently press the white caps (included in the package) onto the lower parts of the holders.
